

Undergraduates. Overmedicated:

A Look at the Rampant Use of Prescription Drugs During Final Exams

1 in 3 students who are taking prescription drugs to get through finals obtained them without a prescription from a doctor.

15%
of students

have or have a friend who has ordered drugs over the internet without a prescription. This statistic is alarming considering that as of fall of 2011, when the most recent census was taken; nearly 19.7 million students were enrolled in colleges and universities around the country.

71% of parents with students enrolled in college or had a student graduate in the last 5 years think it is common for college students to share prescription medications among their friends.

**More than
2 to 1**

of parents of current college students or recent graduates do not feel that law enforcement is doing enough to curb the sale of illegal prescription drugs via the internet (41.2% to 17.4%).
